Start with a sheet

01 Click the paper and start typing. Put a thought exactly where you need it.

02 Choose a pen for a sketch. Select text and add a coloured marker.

03 Open Desk: arrange pages, collect a stack and connect ideas.

Templates

Begin with notes, a sketch, a mind map or a project stack. Open a template and save your own copy.

Zero on Paper

One sheet. Six panels.
A small guide to keep beside your keyboard.

Get Zero

ioditor.github.io/
zero.github.io/

Zero project address.

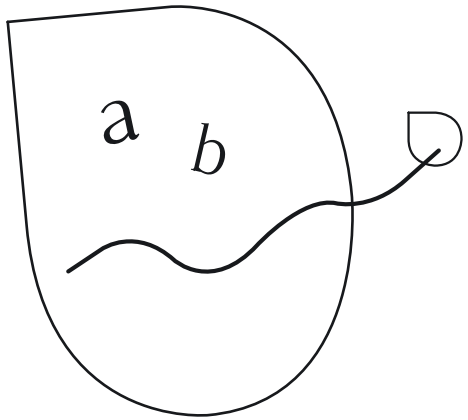

Print and fold

A4, 100%, both sides. Flip on the short edge. Inside face up: fold the narrow right flap left, then the left panel right.

ZERO

Digital paper.

Write anywhere.
Draw freely.
Connect ideas.

03 / WRITING

A thought in place

Text is free from a single flow. Start anywhere on the sheet, move fragments and change the direction of writing.

Letters in space

Convert text to spatial text: move and rotate individual letters. Words become part of the composition.

Still

A calm voice for body text.

Flow

Expressive headings.

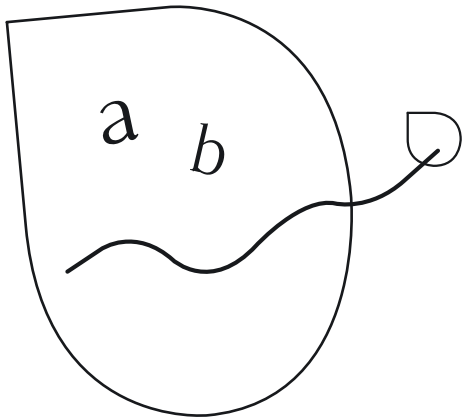

Mono

An even character rhythm.

04 / DRAWING

A line by hand

A fountain pen, pencil and fineliner let you think through drawing, from a quick contour to a careful diagram.

Mark what matters

Coloured markers highlight text, including rotated text. Use the eraser to remove unwanted strokes.

05 / DESK

Ideas together

Lay sheets out on Desk, gather them into stacks and add links. Open a page to continue working.

Within reach

`Alt + drag`

Move text

`Alt + Shift + drag`

Rotate text

`Ctrl + 3`

Show / hide Desk

`Ctrl + Z`

Undo

`PgUp / PgDn`

Previous / next page

`F6`
